yCamSim-ultra TrueRaw Camera Simulator 3

yCamSim-ultra TrueRaw Camera Simulator

YYTECH has launched a series of devices for simulating GMSL cameras, such as [yCamSim-basic](#) and [yCamSim-pro](#). The former supports output of YUV422/RGB888, while the latter supports output of RAW8/10/12/14. However, in many cases, we need to perfectly reproduce the original RAW data. To meet this need, we have introduced yCamSim-ultra.
